

## C-SYSTEM

design Massimo Castagna  
2018

A system of horizontal, modular wall units. The precious quality of the finishes - fossil wood or coffee-brown oak - adds a very special touch, while the compact sizes and the simple design allow the creation of different compositions, suitable both for the living area and the bedroom, according to where they are positioned and to the arrangement of the available modules: - open units with a lower shelf available in a range of ten different marble types; - a drawer unit or a unit with a flap door, both fitted with a 'push' opening system; - writing desk that can be accessorized with a round mirror/vanity. Each element can be fitted with LED lights, and the side that lies adjacent to the wall is embellished with a black nickel trim.
